

# *Workforce Trust with AI*

Trust in Organizational AI, informed by the Aug-Oct 2025  
Deloitte TrustID® Workforce Index

# Introducing Deloitte's TrustID®

## Approach based in science

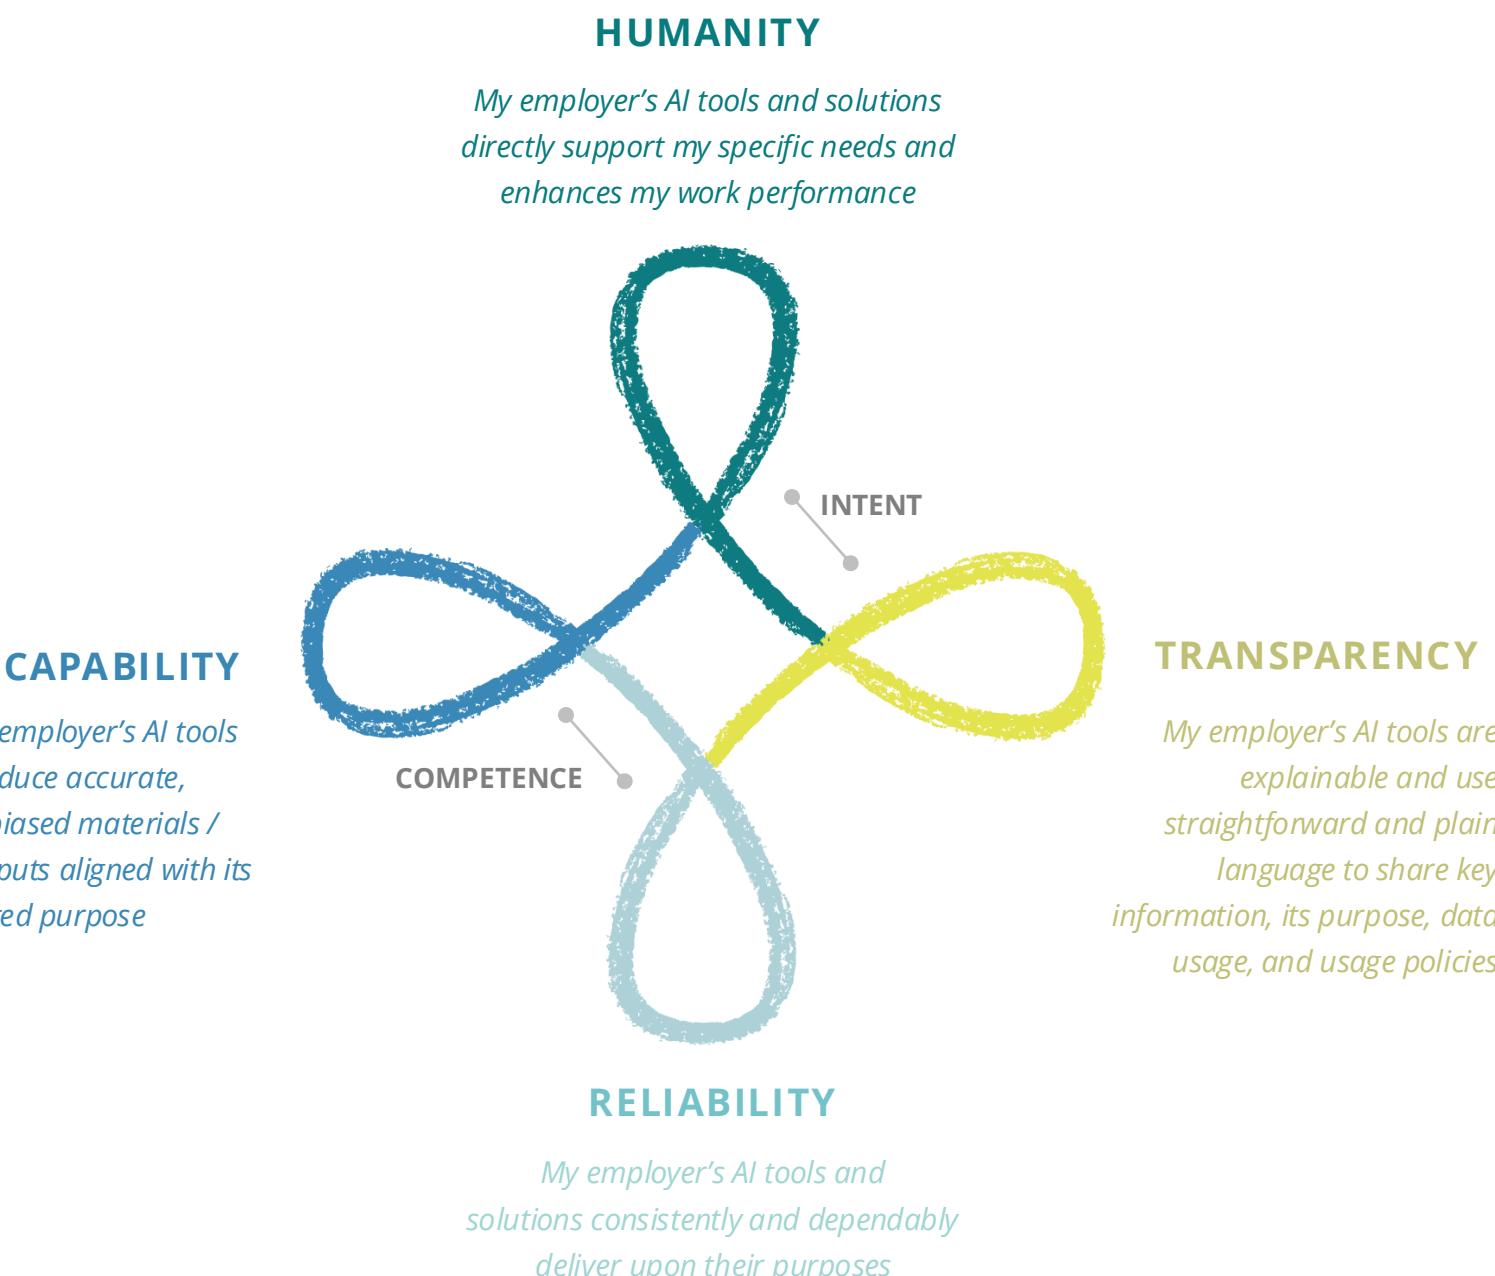

Driven by deep understanding of what drives trust (the four factors), how to build it, and the meaningful results for human behavior

## Actionable insights

Easy to use, applicable across contexts, and directly linked to actions for organizations

## Data-rich platform

Strong breadth and depth of insights at the brand-level (powered by more than 11 million data points each year and grounded in insights from ~500K responses annually)

*We conduct primary research engaging employees in a double-blind survey to maintain TrustID Workforce Indexes across 6 Industries*

Data Collection Period

*Aug - Oct 2025*

Workers Surveyed

*~37k*

Industries Measured

*Consumer (Retail and Consumer Products, Transportation, Hospitality, Auto), Financial Services and Insurance, Life Sciences and Health Care, Technology, Media, and Telecommunications, Government, and Energy, Resources, and Industrials*

# **Executive Summary:** Workforce Trust with AI (Q3 vs Q4)

## ***Key Changes compared to last quarter:***

- Average **GenAI Availability** for workforce **decreased** by **6%** (from 72% to 68%) **and** Average **GenAI usage** has **decreased** by **3%** (from 71% to 69%)
- **Workforce trust in GenAI** has experienced a **29% decrease**, indicating a significant shift in employee sentiment on AI relative to the prior quarter
- **Frontline employee** trust in AI **declined by 29%**, while **corporate employee** trust **decreased by 25%**
- **Staff** experienced the most significant **decrease** in AI trust at **46%**, with **Managers** and **Leadership** showing declines of **20%** and **5%** respectively
- Trust in AI **decreased by 29%** among **Male** employees and by **25%** among **Female** employees
- Across generations, **Millennials and Gen X** reported a **29% decline** in trust in AI, followed by **Gen Z** at **21%** and **Baby Boomers** at **20%**
- For workers with GenAI available at work, **37%** reported **non-compliance** with their **employer's AI policies down from 43% last quarter** through use of unapproved GenAI solutions
- Employees with **high trust in their employer's GenAI** are now **3.3x** more likely to use **GenAI daily** up from **2.8x** and are **saving 2.3x more hours per week** up from **2.0x** in previous quarter

# What do trust scores mean?

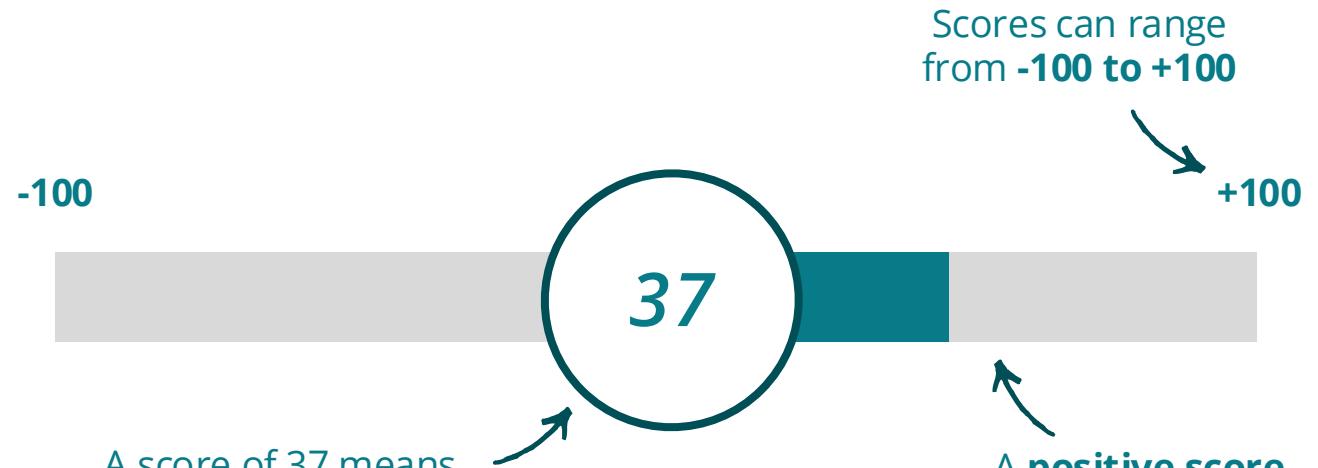

## HUMANITY

A brand's factor score is calculated as the percentage difference between respondents who agree and respondents who disagree with each factor statement

For example, a brand's **Humanity** score is:

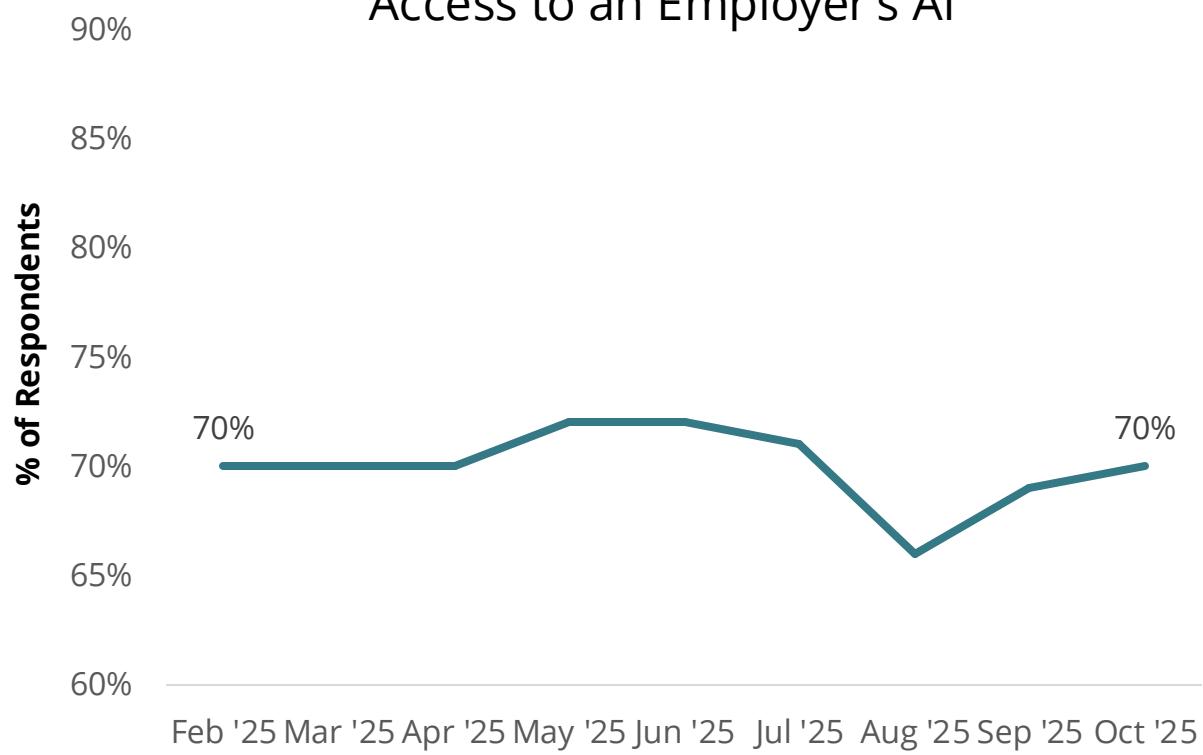

**%** **Strongly Agree or Agree** **-** **%** **Strongly Disagree or Disagree**

...with the statement:  
The brand demonstrates empathy and kindness towards me, and treats everyone fairly

Despite workplace access to GenAI remaining steady, overall GenAI usage has declined by 11%

Access to an Employer's AI

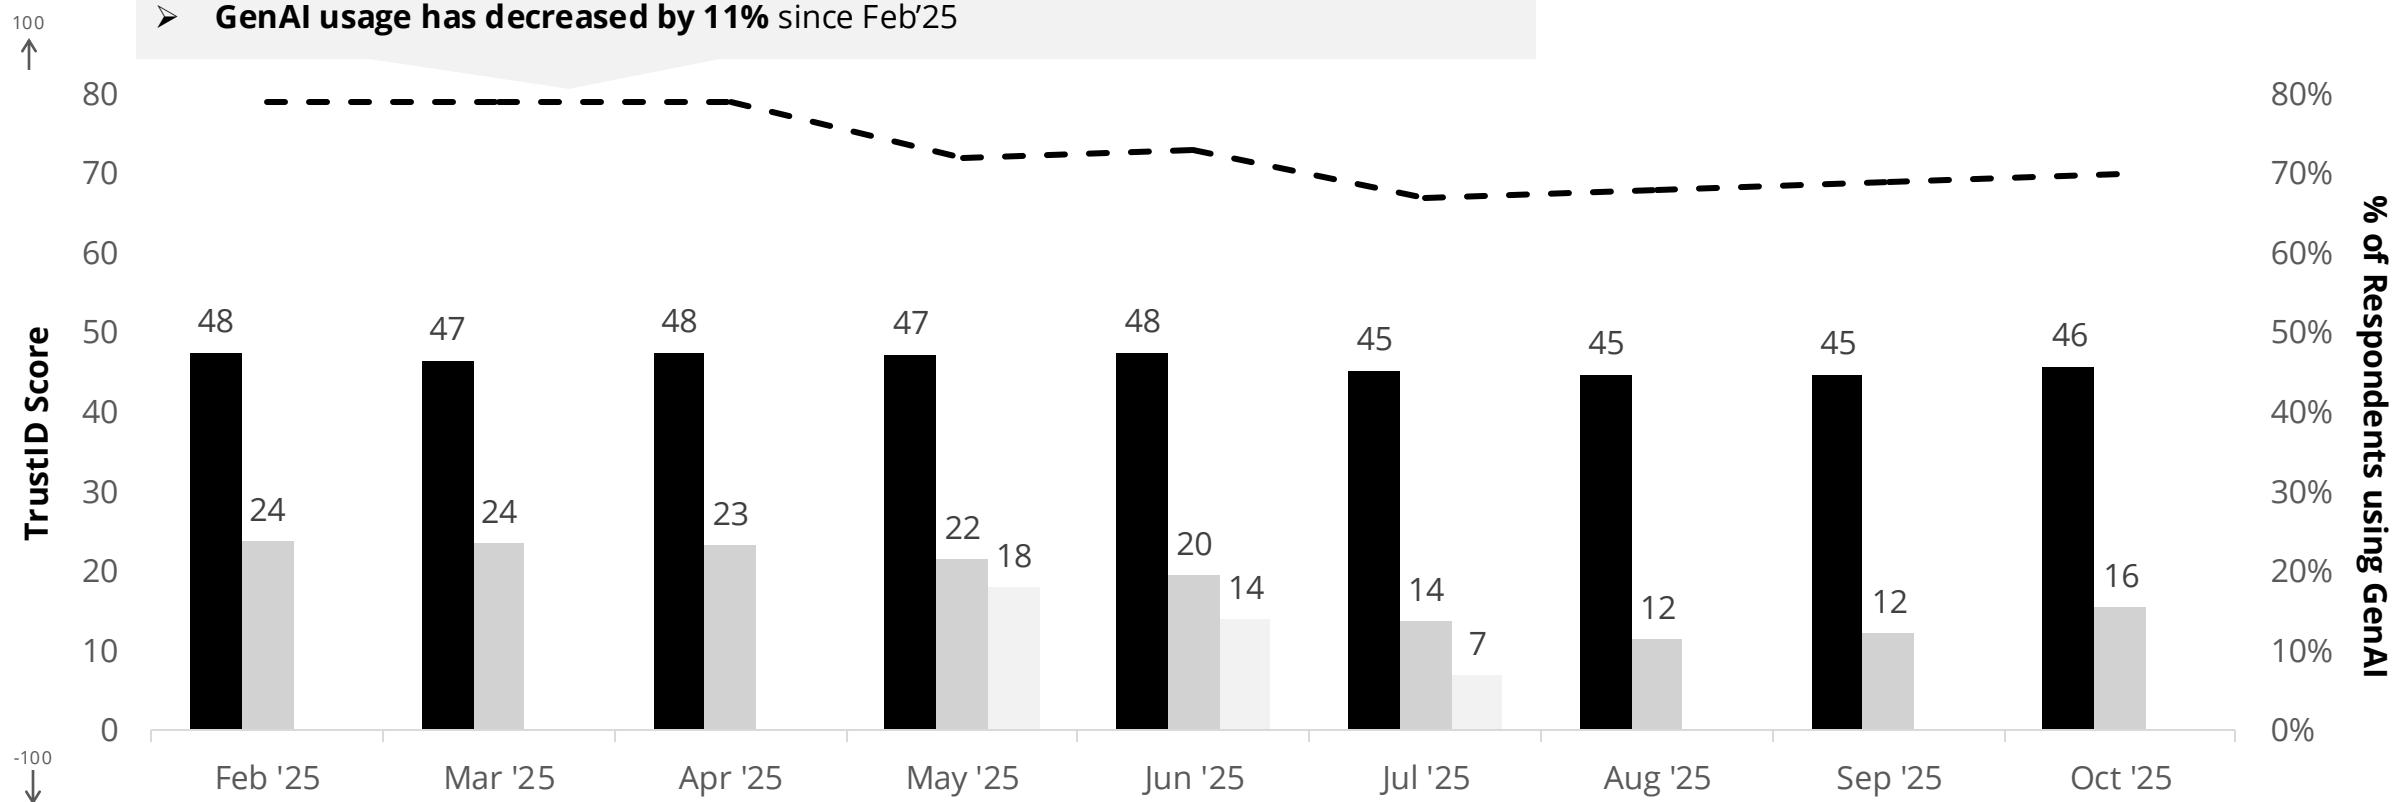

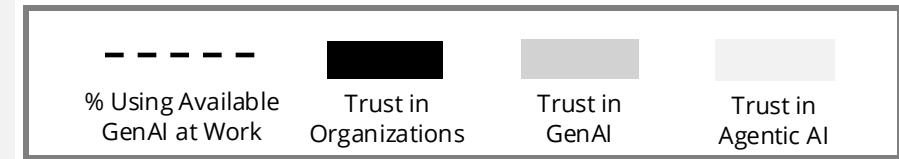

Usage of an Employer's

Workforce trust in GenAI has dropped 35% since May 2025, aligning with a 11% decline in usage over the same period

### High-Level Takeaways

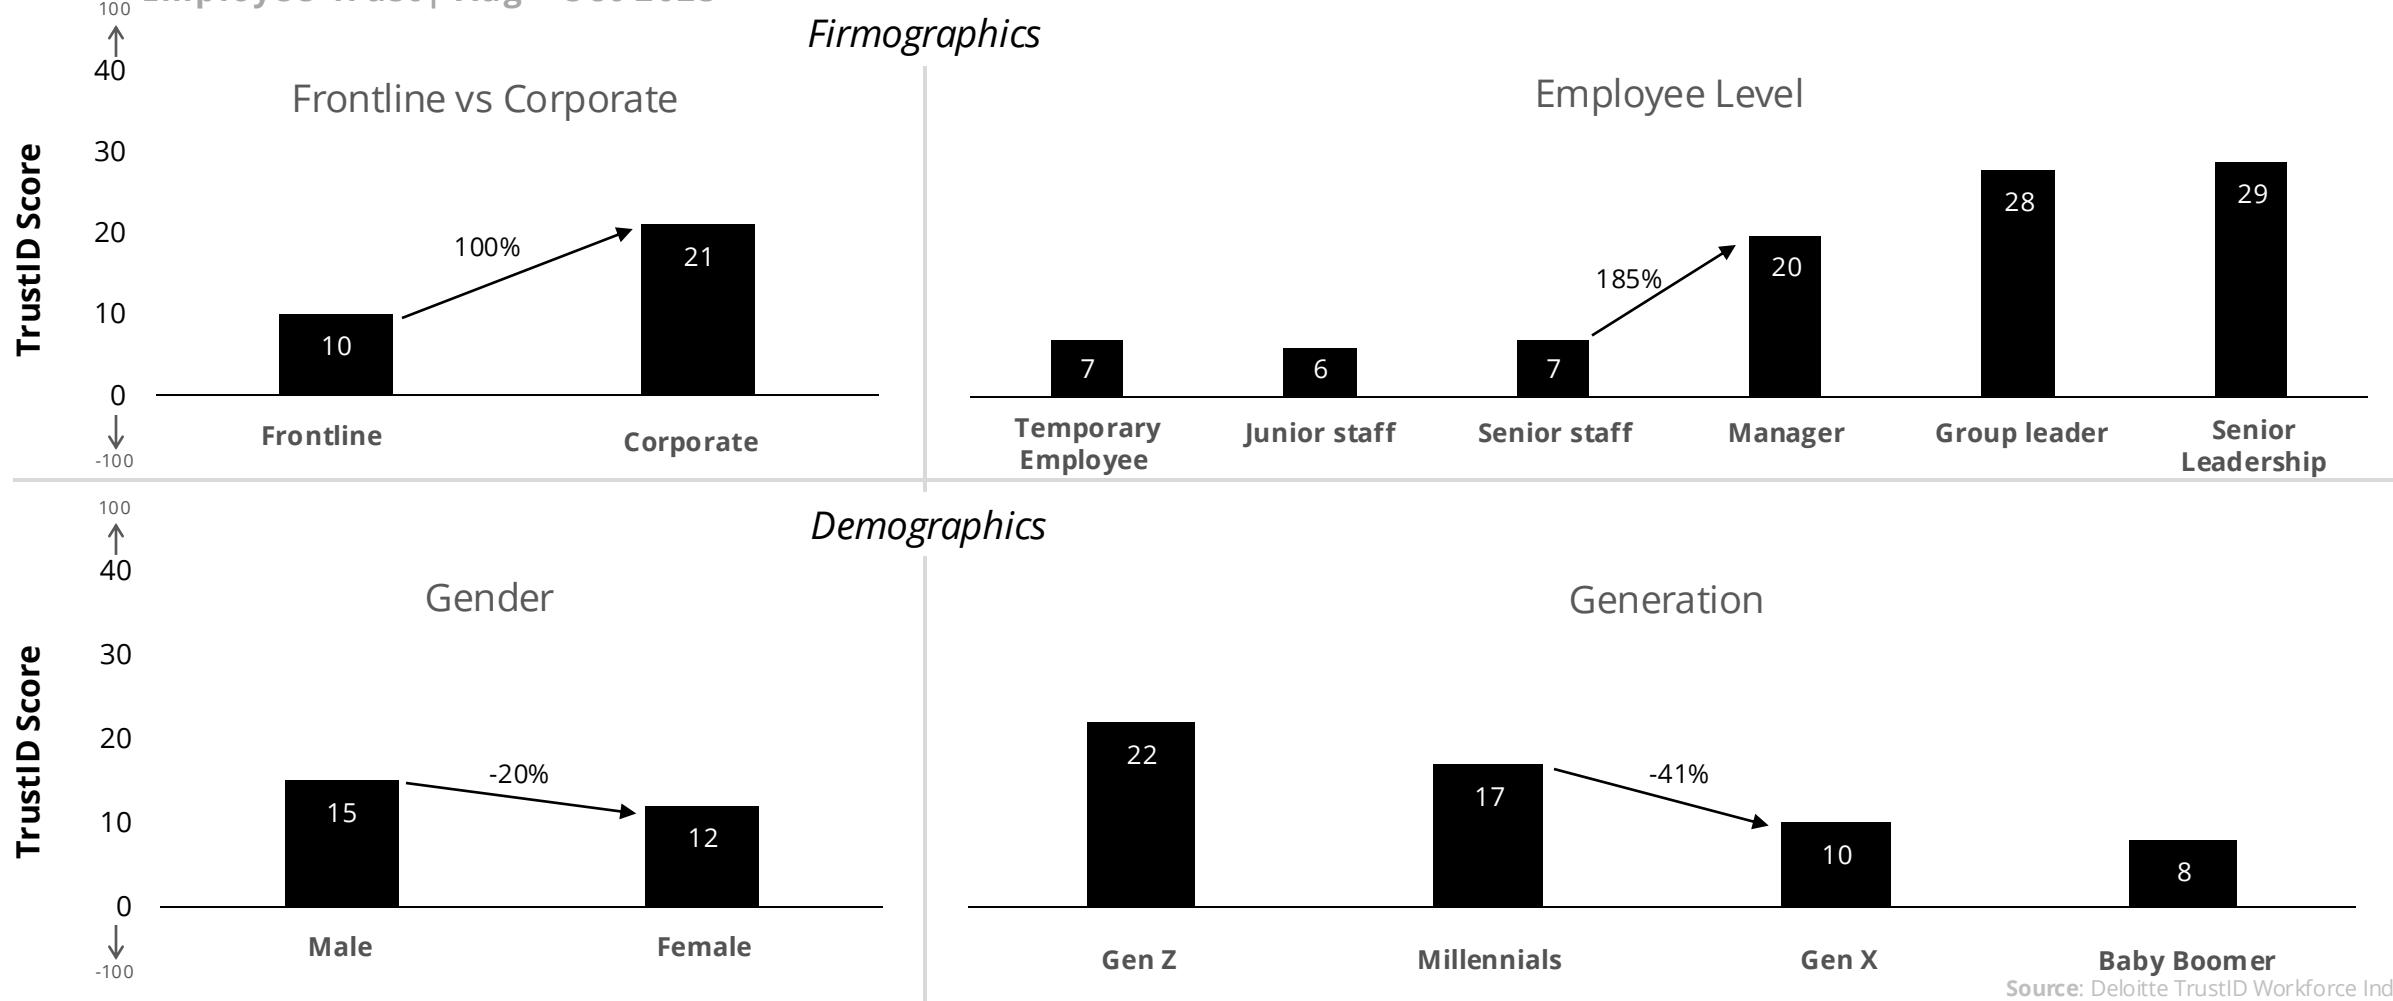

- **Trust in organization** among employees has **declined by 4%** since Feb'25
- **Trust in GenAI** has within employees **declined by 35%** since Feb '25
- **Trust in Agentic AI** within employees has **declined by 61%** from May'25 to Jul'25
- **GenAI usage has decreased by 11%** since Feb'25

Trust in GenAI differs across workforce cohorts; corporate and more senior employees are twice as trusting in GenAI than their respective counterparts

### Demographic/Firmographic Split of Trust in GenAI

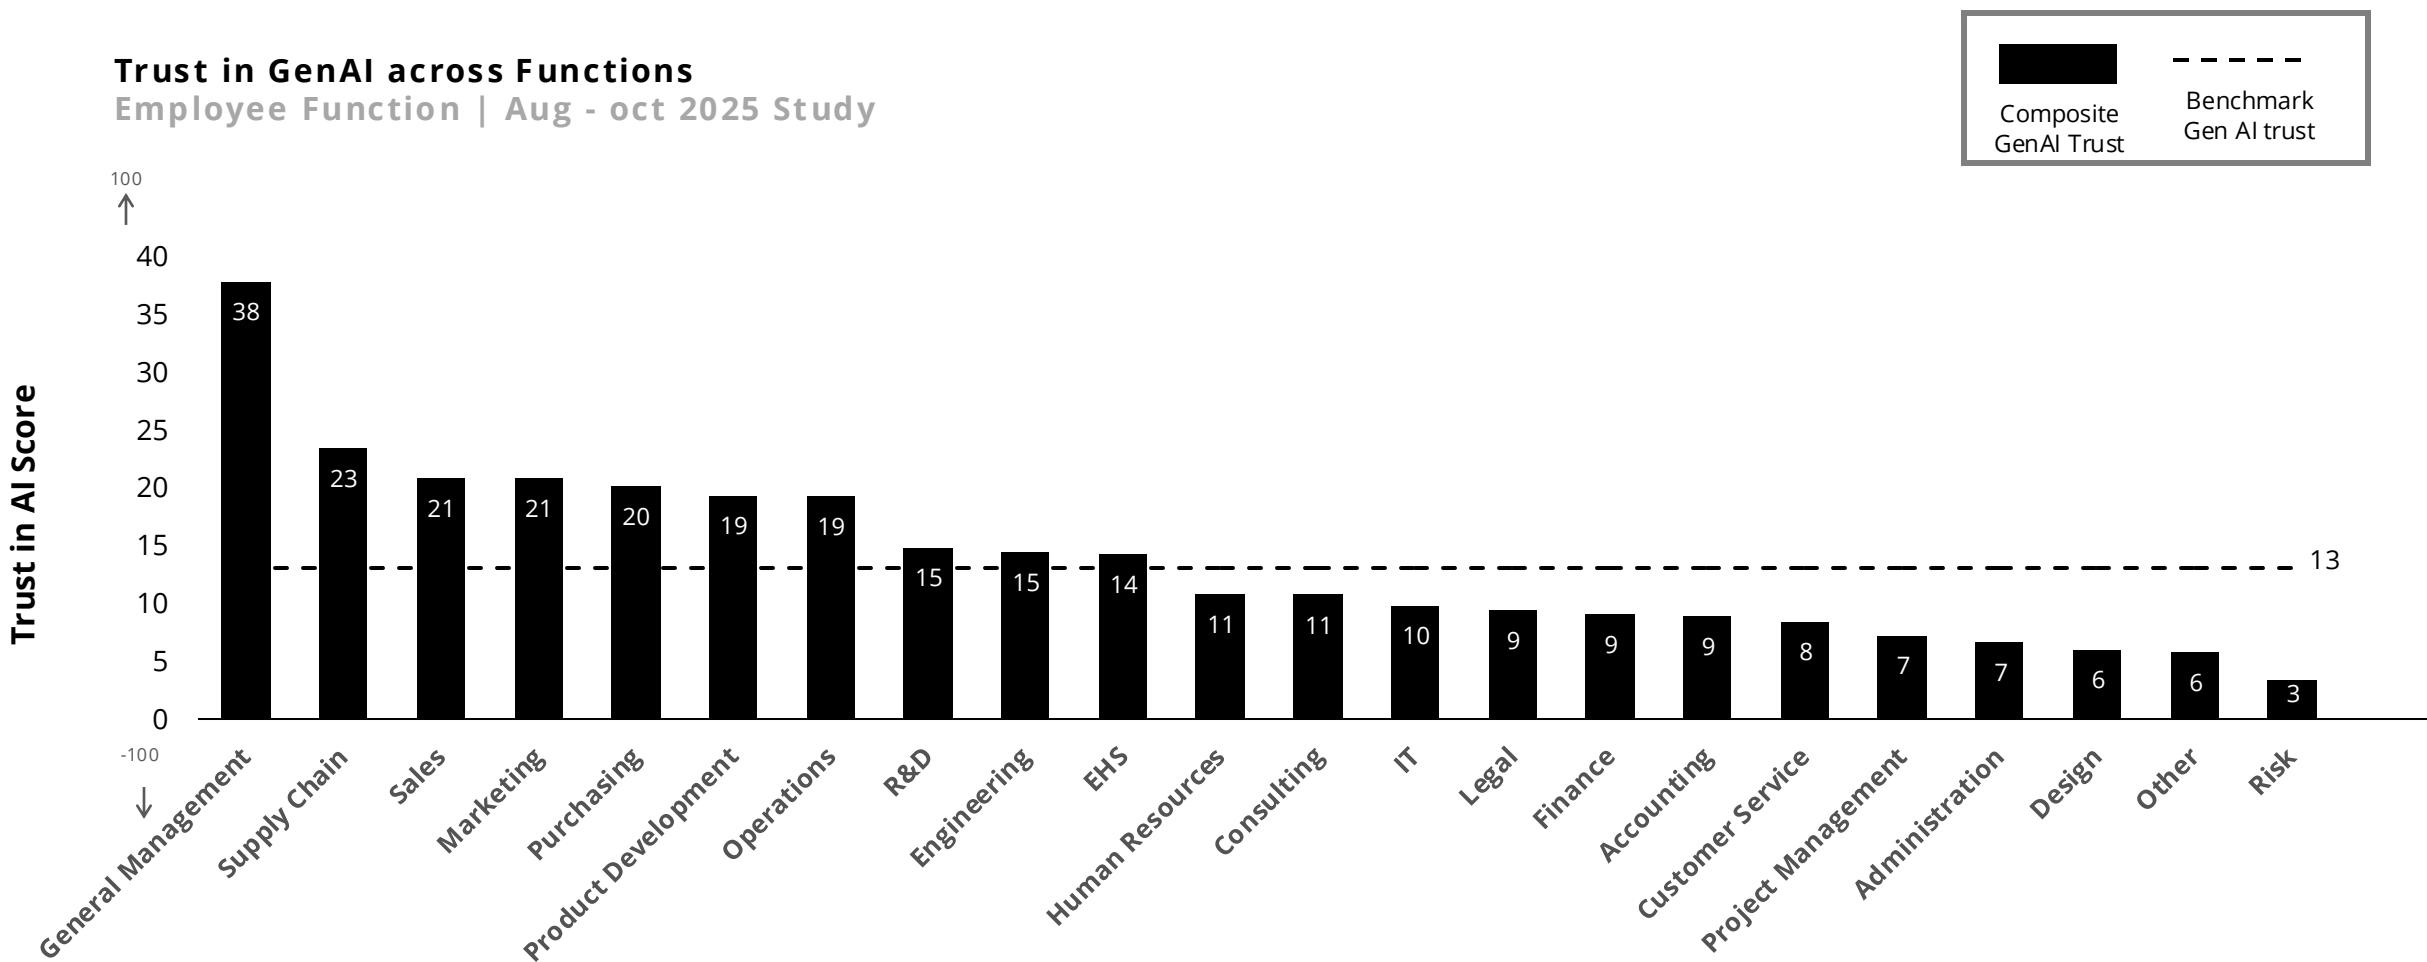

Employee Trust | Aug - Oct 2025 Study

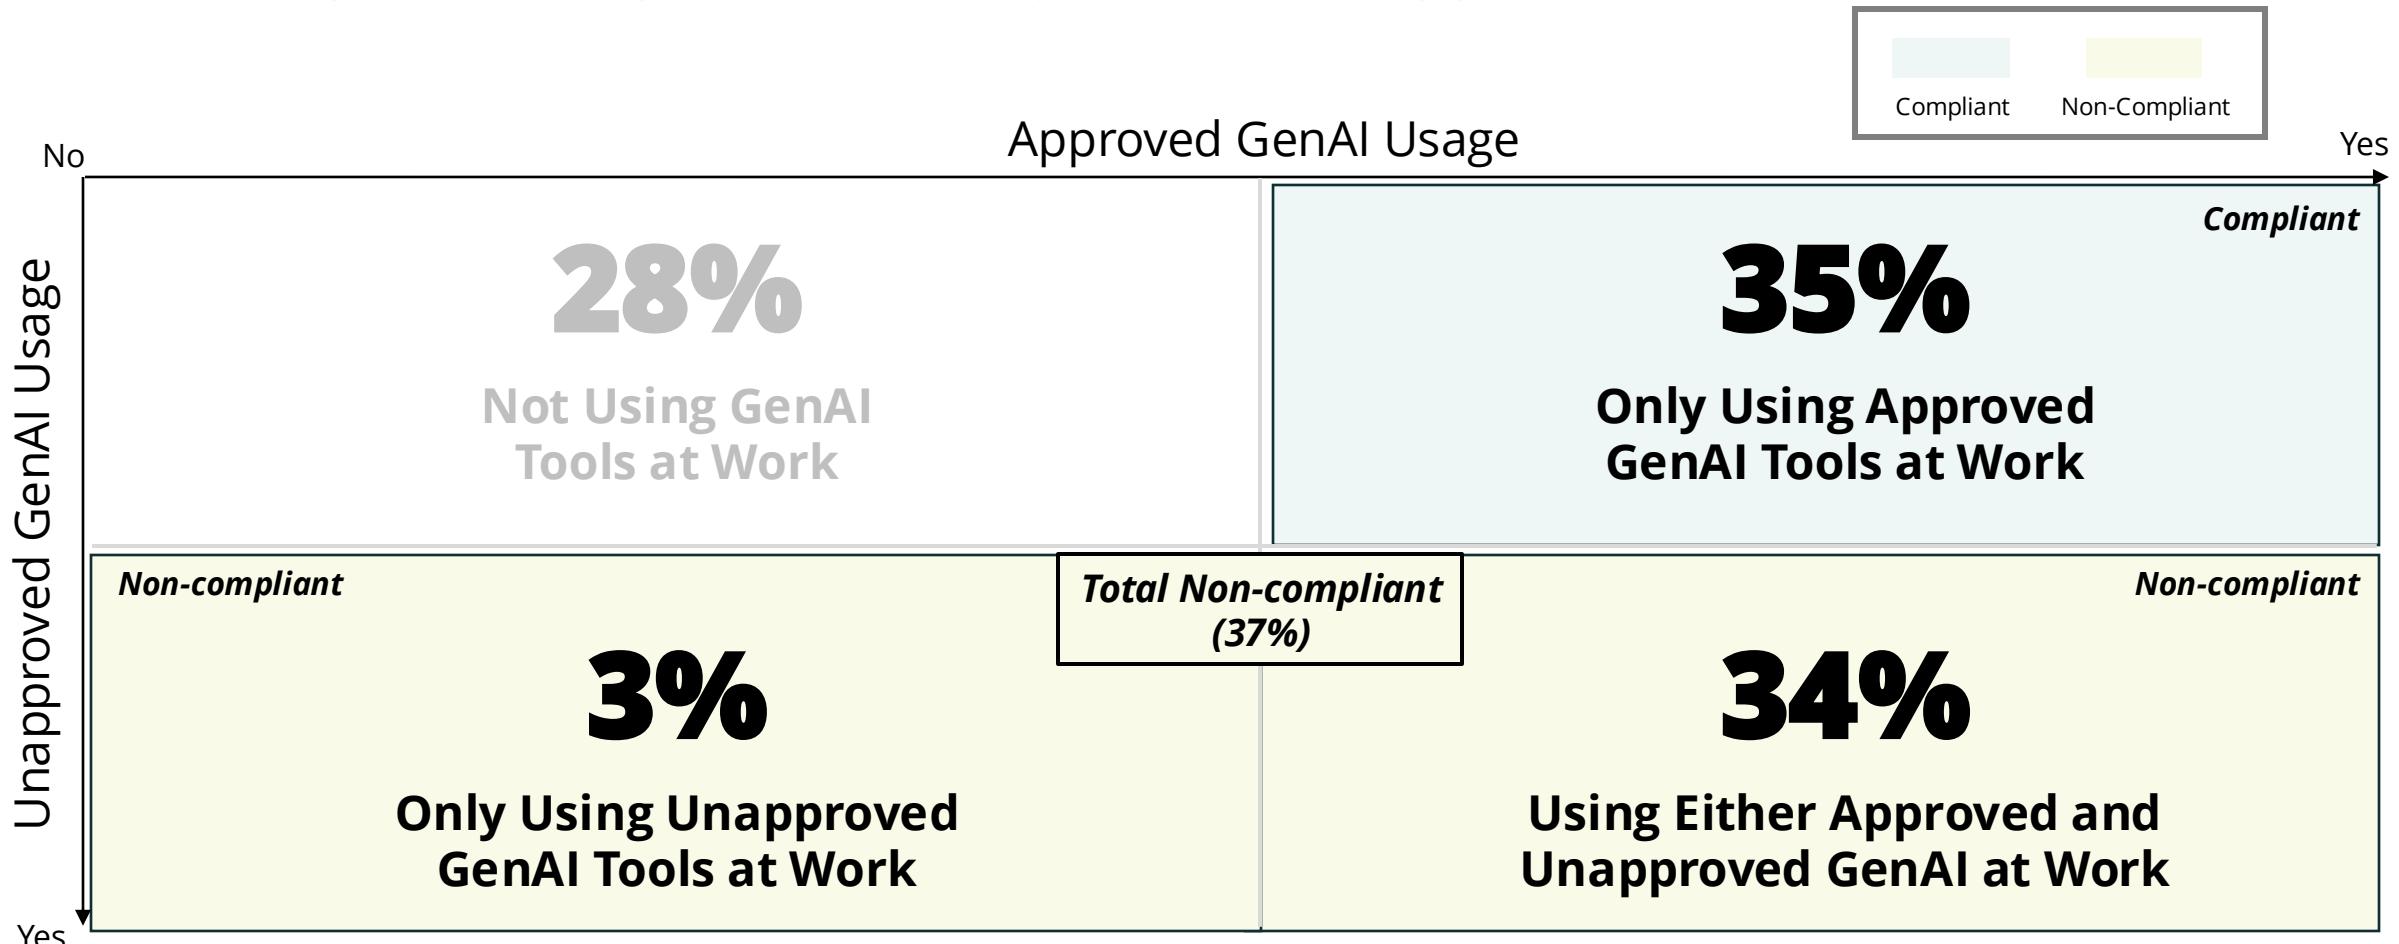

N Counts: Frontline = 5430, Corporate = 4842 | Male = 5855, Female = 6205 | Temporary: 1272, Junior staff: 2319, Senior staff: 1852, Manager/Supervisor: 2445, Group Leader: 1096, Senior Leadership: 1156 | Gen Z=1189, Millennial=4029, Gen X=4133, Baby Boomer=2757

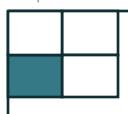

Note: Numbers are rounded to the whole percentage point and trust score for display on the slide

# Workforce Trust in GenAI highest among General Management and lowest in Risk

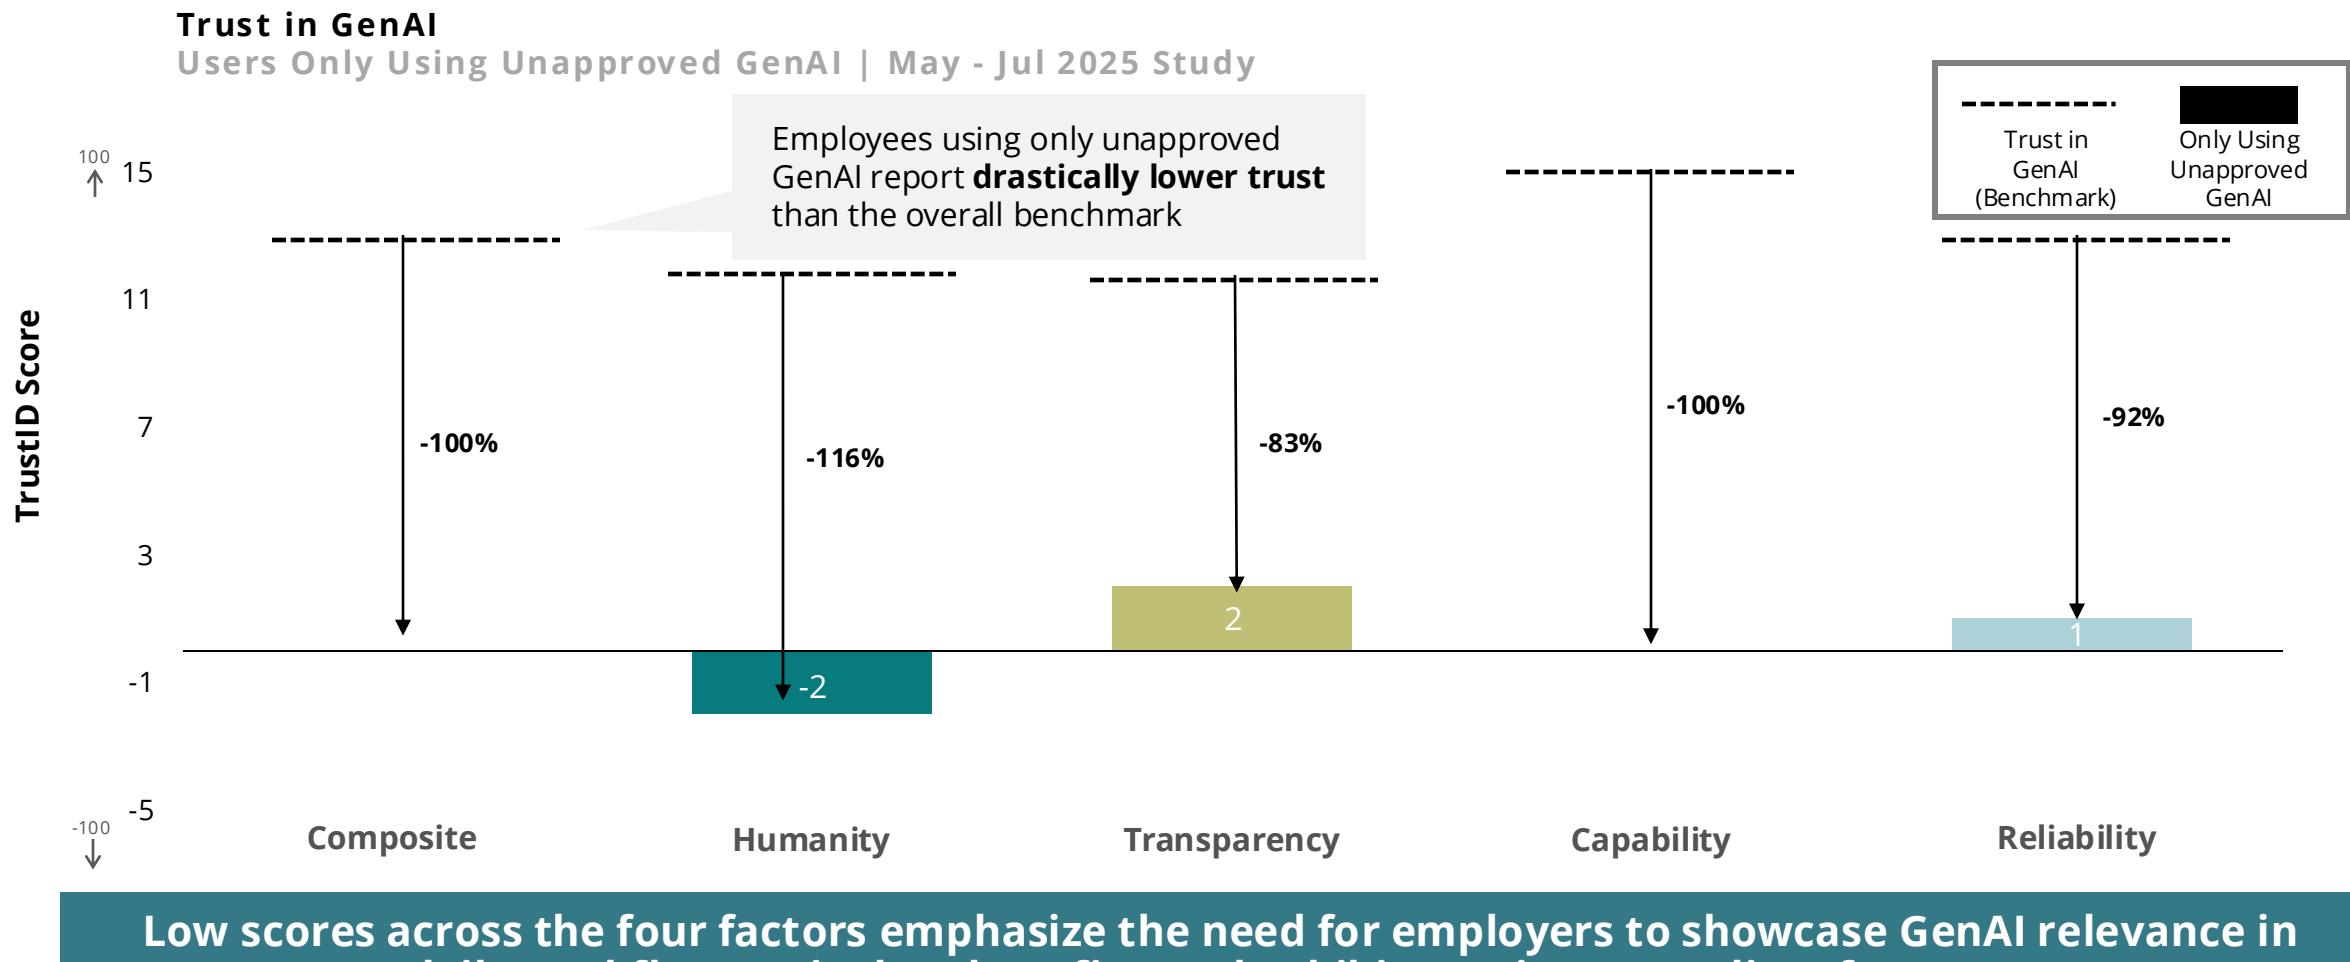

For workers with GenAI available at work, 37% report non-compliance with their employer's AI policies through use of unapproved GenAI solutions

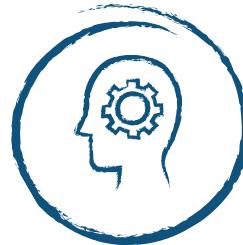

Non-compliant behavior is correlated with lower AI trust: Workers using unapproved GenAI tools have lower trust in their employer's GenAI solutions

# TRUST FUELS AI ADOPTION

*For example, when **TRUST** in an employer's GenAI is **HIGH**,  
**WORKERS** are...*

**3.3x**

More likely to use GenAI daily  
for work

**2.3x**

More hours saved per week  
overall (~2.3 hrs on average)

**1.5x**

More likely to only use  
approved GenAI for work
